

**I CLAIM:**

1. A collapsed umbrella with shrunk volume being characterized in  
5 providing a joint with wide base, which has two pins to pivot with  
second rib and third rib, being counted from outside, respectively, and  
the second rib and the third rib being positioned in collision side by  
side.
2. A collapsed umbrella with shrunk volume as claimed in claim 1,  
10 wherein the collapsed umbrella has at least four ribs to form the frame.
